This special issue invites experimental, analysis, and review articles focussing on solutions related to metal 3D printing of biometals with tunable stress shielding capabilities. Along with the design/ topographic optimization use of novel, hybrid materials is of interest in this special issue (covering both human and veterinary applications). The multi-material 3D printing covering more than one metallic alloy for reducing the stress shielding, digital twinning of developed 3D printed implants is also of interest in this special issue.

Submission Deadline:

June 30, 2024

Benefits to Submit and Publish

- ✓ Free Publication
- ✓ Open Access
- ✓ Peer-Reviewed
- ✓ Wide Promotion
- ✓ Authors Hold Copyright
- ✓ Chances to Win "Highly Cited Paper Award"

Special Issue

Exploration of BioMat-X

Exploration of BioMat-X is a peer-reviewed open access online journal. EBMX publishes papers of the highest quality and significance in all areas related to biomaterials.

Editor-in-Chief

Maryam Tabrizian H-index: 60

Full Professor at Department of Biomedical Engineering at McGill University, Montreal, Canada.

Editorial Board: 67 eminent experts from 27 countries such as Canada, France, Italy, Australia, USA, Romania, etc. ; 47 for average H-index

【About Publisher】

Open Exploration currently provides authors with **Free Publication** service, keeping to improve the publication quality to provide better platform for researchers around the world. After 3 years' development, the publisher has 14 high quality journals as follow.

Exploration of Targeted Anti-tumor Therapy (**PubMed/PMC & Scopus & DOAJ indexed**)

Exploration of Medicine (**Scopus & DOAJ indexed**)

Exploration of Immunology (**Scopus & DOAJ indexed**)

Exploration of Neuroprotective Therapy (**DOAJ & CAS indexed**)

Exploration of Digestive Diseases (**DOAJ indexed**)

Exploration of Neuroscience (**DOAJ indexed**)

Exploration of Musculoskeletal Diseases (New)

Exploration of Asthma & Allergy (New)

Exploration of Drug Science (New)

Exploration of Foods and Foodomics (New)

Exploration of BioMat-X (New)

Exploration of Digital Health Technologies (New)

Exploration of Cardiology (New)

Exploration of Endocrine and Metabolic Disease (New)
