Supplementary Figures

|	OR (95% CI)
Metoclopramide	OR = 0.20 (0.10 − 0.40) *
Gender	OR = 0.73 (0.43 − 1.25)
Age	OR = 1.00 (0.97 − 1.02)
BMI	OR = 1.11 (0.95 − 1.28)
Cancer subtype	OR = 0.96 (0.56 − 1.65)
Stage	OR = 0.99 (0.52 − 1.91)
Underlying disease	OR = 1.09 (0.62 − 1.89)

Figure S1. Forest plot of univariate analysis for complete control. OR: odds ratio; CI: confidence interval; BMI: body mass index; *: indicates statistical significance with $p < 0.05$.
Figure S2. Forest plot of univariate analysis for nausea control. OR: odds ratio; CI: confidence interval; BMI: body mass index; *: indicates statistical significance with p < 0.05.

Figure S3. Forest plot of univariate analysis for vomiting control. OR: odds ratio; CI: confidence interval; BMI: body mass index; *: indicates statistical significance with $p < 0.05$.

Figure S4. Nausea control rate across stratified subgroups.

Figure S5. Vomiting control rate across stratified subgroups.
