

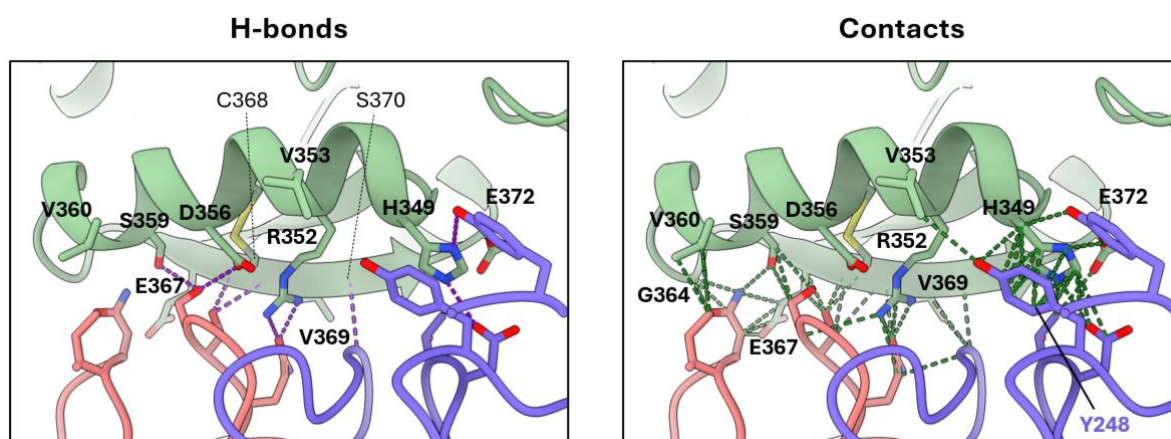

Figure S1: Hydrogen bonds and residue-residue contacts between Tf (green) and TbTfR (pink+blue) in the first binding region.

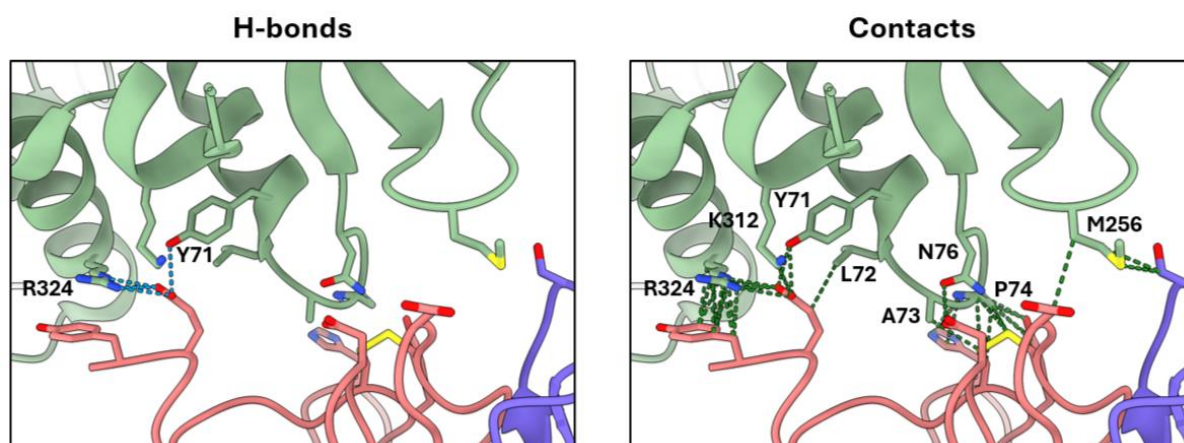

Figure S2: Hydrogen bonds and residue-residue contacts between Tf (green) and TbTfR (pink+blue) in the second binding region.

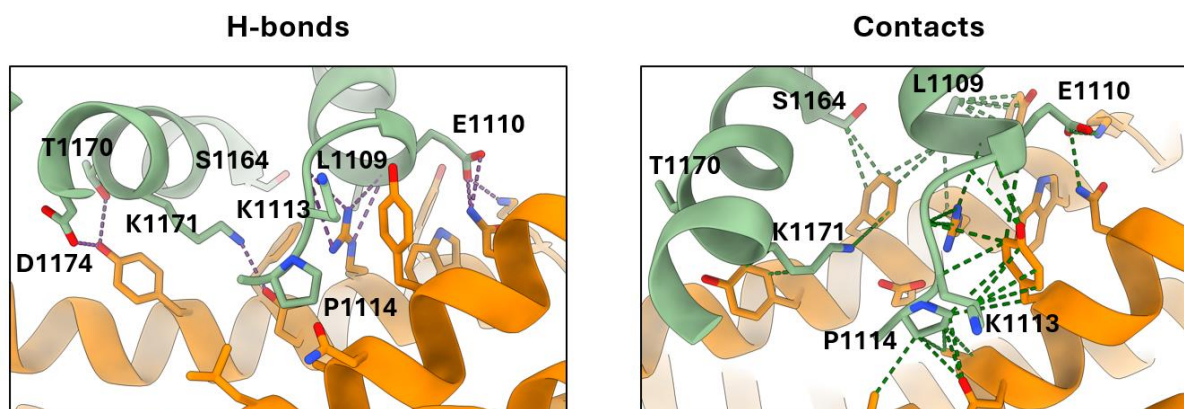

Figure S3: Hydrogen bonds and residue-residue contacts between C3d (green) and ISG65 (orange).

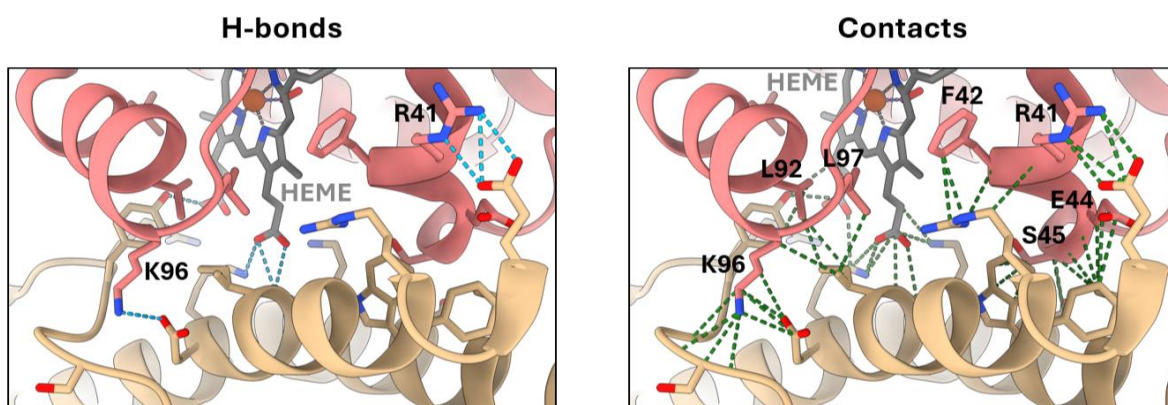

Figure S4: Hydrogen bonds and residue-residue contacts between holo- β Hb (pink) and HpHbR (gold).

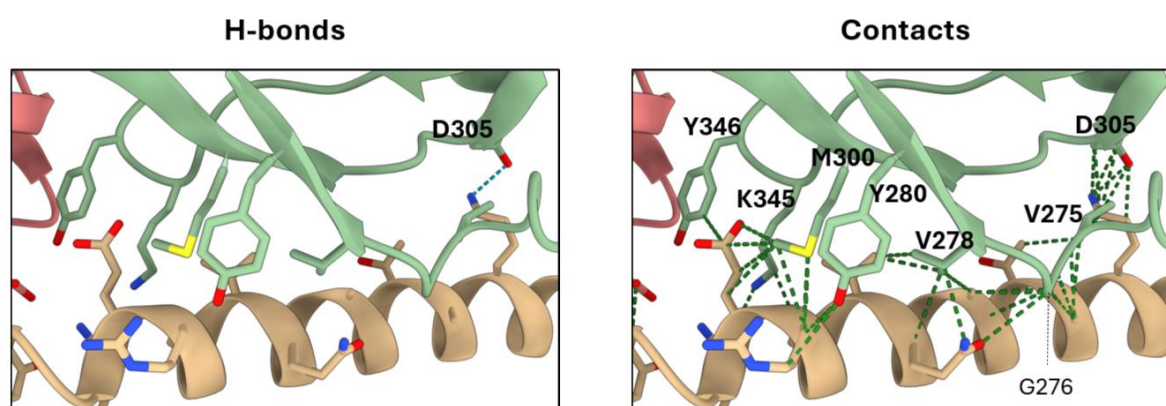

Figure S5: Hydrogen bonds and residue-residue contacts between Hp (green) and HpHbR (gold).
