Figure S1. Effect of Semaglutide and Resmetirom on liver fibrosis in ob/ob-MASH model. (**A**) Representative pictures of Sirius Red staining showing degree of liver fibrosis; (**B**) liver fibrosis score assessed by an external expert pathologist; (**C**) representative pictures of IHC staining showing α-SMA expression; (**D**) quantitively data of α-SMA expression. Data are expressed as mean ± SEM. *n* = 9 mice per group. ns: no significance, * *P* < 0.05.
